

Thanks for Purchasing Mp3OraXtr

First of all this is a major update, almost all URL structure has been changed!, This will work with only new fresh install, You may use old database but all URL structure will be changed.

### Installation:

Create a database from you hosting control panel, and than upload all files from “Uploads” directory to your server, and point you browser to <http://website.com/install>

And follow the step!\

For further detail, watch the video “Video\_Installation.mp4” file!

After installation don’t forgot to change admin username/password from config.php file

Find:

```
$admin_user='admin';  
$admin_pass='admin';
```

Replace:

```
$admin_user='username';  
$admin_pass='password';
```

### Professional Installation Service:

If you want us to install script at your server, please order another license and give us Database and FTP details, we will install as soon as possible! Installation dose not include Youtube API, you have to provide us, as well as we did not edit or update language, default setting from admin panel, also css,js,php and html updates are not include.!

### Change Log:

1. Multi Language Support (En, Fr, Br, De).
2. SEO url structure changed to support Multi Language
3. Admin panel Revised, Improve Data Store and Fetch.
4. Rewrite URL change from Admin panel.
5. Language Editor, Edit Language text as per your requirements.
6. New Layout with Alot of HTML improvements.
7. Fix Slow Query in fresh.php file
8. Update sitemap php file to support upto PHP 7
9. Step by Step Installer for easy install.
10. Added a Video Tutorial
11. Alot of small changes to fully optimized with SEO.

Thanks,
